

## PHOENIX MANUAL GUM TAPE DISPENSER

# PRODUCT DATA SHEET

## M-1 PHOENIX MANUAL GUM TAPE DISPENSER

### DESCRIPTION

Phoenix® M-1 manual gummed tape dispenser designed to feed, moisten and cut water activated tape for case sealing applications. Designed as a durable, hassle-free solution for use with tapes ranging in width from 38mm to 76mm, the M-1 dispenser can dispense tape lengths up to 762mm with a single pull of the handle - and longer lengths with multiple pulls - to deliver professionally sealed packages.

### FEATURES

#### CORROSION RESISTANT

Steel construction with baked enamel finish prevents corrosion.

#### GOOD STABILITY

Continuous bottom edge crimp on both sides provides stability.

#### WATER-ACTIVATED ADHESION

For use with water activated tapes WP 100 & GP 100.

#### CONVENIENT STORAGE

Features a utility top for convenient storage of markers, pens, knives, hand stamps and more.

#### SMOOTH MANUAL FEED

The smooth manual feed dispenses up to 762mm in a single pull of the handle - can deliver longer lengths with multiple pulls.

#### REDUCED LABOUR & WASTE

The dispensers cut tape to desired measurements to help reduce labor, maximize efficiency and minimize waste.

### TYPICAL APPLICATIONS

- Used to feed, moisten and cut water activated tape to desired measurement in case sealing applications.
