

# FLASHBAND INSTANT REPAIR

Permanent Roof - Flashing - Gutter Repair System

A self - adhesive, aluminium faced, bitumen backed sealing tape for exterior applications.

## FEATURES:

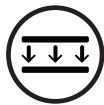

### STRONG BOND, LONG LIFE

Strong bond bitumen adhesive. Long life in most climates - 15 years life expectancy (if applied correctly).

### WATERPROOF

Excellent waterproofing properties.

### PERMANENT SEALING

For emergency repairs or new builds. Provides a permanent watertight seal & bonds to most building materials.

### 15+ YEARS UV & WEATHER RESISTANCE

Offers long lasting protection in most climates. Excellent in exterior UV / weather conditions for watertight sealing.

### EXCELLENT HEAT RESISTANCE

Superior heat resistance from - 10°C to +100°C.

### OVER PAINTED

The 0820 Flashband can be over painted.

## DESIGNED FOR:

- Excellent for permanent waterproof repairs to roofs, guttering, flashings & various pipes.
- Ideal for new construction, maintenance & repair projects.
- Ideal for protecting and sealing glazing bars and skylights.
- Used in greenhouse watertight repairs, leak mends in drain pipes and guttering.
- Bonds to a wide range of building materials and surfaces.

Surface testing always recommended to assess tape suitability to the surface & application. See surface application & preparation guide on: [www.tapespec.co.nz](http://www.tapespec.co.nz)
