

GLASS & MULTI SURFACE PROTECTION

Avoid Damage & Costly Cleanup

6035 - SURFACE PROTECTION FILM

Extra tough Green Polyethylene Film coated with a solvent free pressure sensitive acrylic adhesive. Designed for temporary protection of various surface areas & will remove from most surfaces without leaving residue behind.

CODE: 6035

Colour: Transparent Green

Roll Length: 100 meters

Bulk – Can be slit from master log roll 1200mm wide

Standard Bulk: 200, 300, 600 & 1200mm

Retail Label (Barcoded)

Standard Retail: 200, 300, 600 & 1200mm

FEATURES:

Good balance of adhesion for temporary protection of:

- Glass surfaces - windows, glass doors & splash backs
- Aluminum window frames
- Most metal & plastic surfaces

Clean removal without leaving residue behind:

- Medium Adhesion – Safe Release
- For exterior use up to 3 months
(we always recommend prior testing to assess surface to application suitability).

PROTECT AGAINST:

Paint overspray & splattering

Dirt, dust & weather condition

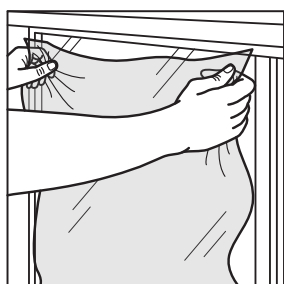

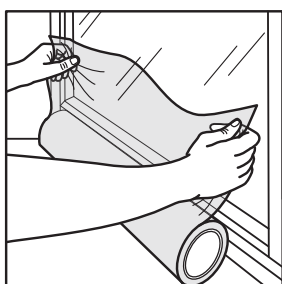

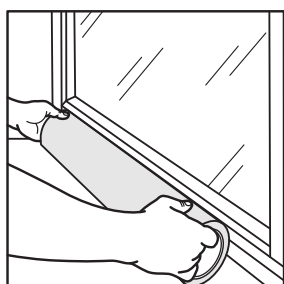

Surface abrasion & scratching

Cement splashes

FOR BEST RESULTS:

- 01** — The protection film roll stays on the ground or is hand held in the position.
- 02** — Next the film is pulled up away from the window to the top.
- 03** — Then the film is wiped on back down the window surface to ensure good clean adhesion.
- 04** — The film roll can be cut to suit the window and sash requirements.

IMPORTANT:

Surface testing always recommended to assess tape suitability to the surface & application. See surface application & preparation guide on: www.tapespec.co.nz
