

# SUPERDISCS

## Fantastak SuperDiscs

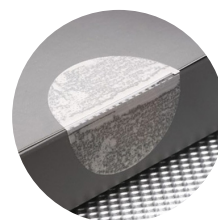

The SuperDiscs are transparent adhesive circular discs, made from high strength polypropylene film and are available in various sizes and forms.

They are coated one side with Acrylic adhesive either high tack permanent or low tack peelable type.

### The Acrylic Adhesive is:

- FDA & ISEGA approved for direct contact with food & pharmaceuticals.
- It is acid and lignin free.

## Features:

- They are supplied in roll form, with a removable release backing paper.
- Each disc can be individually removed easily and attached as required.
- Supplied in dispenser boxes for ease of use.

## Product Codes:

Standard circular size (stocked in NZ) is 25 mm  
Other sizes available ex manufacturer : 18, 34 & 50 mm

Code.	Description.	Discs per roll.	Status
1012/2.	Perforated / Peelable.	2000.	Indent
1013/2	Perforated / Permanent.	2000.	Ex stock
1014/2.	Non Perforated / Peelable	2000.	Ex stock
1015/2.	Non Perforated / Permanent	2000.	Ex stock

## Benefits & Applications:

**For a quick, clean, safe, discreet & immediate bond.**

**Used for:** Mailers, envelopes, foodstuff sealing, tamper security, packaging & for promotional items.

- The clean professional look of the SuperDisc adds to the overall appearance of the packaging, while other methods such as attaching small bits of tape can detract from what should be a quality finished appearance.
- The importance of safely securing products during transportation and handling to ensure their integrity remains in tack & there is no contamination, whether you use a permanent or peelable disc.
- The SuperDiscs assist in making packaging tamper proof especially important in the food, pharmaceutical,

cosmetics, clothes & gift markets. The permanent disc acts as a preventive barrier, while the Perforated type also provides a barrier plus easy opening once the product has been purchased. Both discs if tampered with can be easily identified as being opened before a sale has been made.

- Used for sealing boxes, bags, & gift wrap at the checkout.
- Excellent as a discreet finishing seal on wrapping tissue paper in retail or e-commerce outlets ensuring branded packaging is not compromised.

# PAPERDISCS

Fantastak PaperDiscs

The permanent natural rubber adhesive paper disc offers an environmentally friendly alternative to the polypropylene plastic SuperDiscs.

Offering good transparency & bonding characteristics to most substrates, when used for indoor applications.

## Product Code:

Standard circular size (stocked in NZ) is 25 mm  
Other sizes available ex manufacturer : 18, 34 & 50 mm

Code	Description.	Discs per roll
1016/2	Permanent - ability to hand tear.	2000

- Supplied in roll form on an easy release paper liner.
