

FANTASTAK SUPERDOTS

Adhesive Dots on a Roll

The Tapespec ranges of SuperDots are translucent hot melt adhesive dots on a release paper roll, and are pressure sensitive.

No Mess, No Residue & No Odour.

Method of Application:

The dots are applied through a box dispenser unit which protects and keeps the dots clean.

Product Information & Features:

Easy -Tak:

Removable grade off most surfaces, suitable for lightweight papers & boards.

Mid - Tak:

Removable grade but with a good initial adhesion. Suitable medium weight papers & items, allowing for clean removal

Ultra - Tak:

Permanent type attachment with a higher tack level. Most common surfaces are onto plastics, textiles & metals. Possible to remove from most non-porous surfaces (test to ensure suitability & no substrate failure). Other tack levels & vertical hold grades are available from the manufacturer.

Extra Features

Superdots Stand: Superdots plastic stands are designed to hold the boxed dots securely in position for ease of use.

Superdot Applicator: Plastic applicator piece that sits on the box to allow for easy transfer of the dot to the required substrate.

Important

SuperDots conform to FDA food approval 175.105 (suitable for indirect food contact, subject to limitations). They comply with Reach Regulation 1907/2006, and are manufactured to ISO standards.

Benefits

- Super dots are a faster, cleaner, cost-effective alternative to hot-melt adhesives, double sided tape, glue guns or slow-drying glues.
- No expensive equipment required to apply glue dots.
- No more burns, fumes or mess.
- Instant application of glue dots and bonding means no need to wait for warm-up or setting.
- Little or no staining after removal (unlike other glue dots) which means it doesn't ruin or mark the print – such as expensive adverts in magazines.
- Shorter length rolls of 2,000 glue dots (available from stock) can be supplied for outworkers.
- Unique backing has a specially coated release paper system, which means first-time removal of glue dots, every time.

Typical Users & Applications

- Fantastak SuperDot glue dots are used by various industries – such as **print finishers, contract packers, direct mail companies, packaging businesses and product assembly firms.**
- As glue dots, they can be used for attaching items such as CDs and free samples to magazines, packaging and other promotional literature. And since SuperDot's bond is instant, productivity goes up while the cost of labour comes down – and there's no need for expensive hot-melt glue machinery.
- For adhering plastic cards (credit cards & membership type), badges & promotional giveaway items to various mailing & direct marketing material.
- Used by florists to attach message cards onto flower wrapping paper & cellophane.
- Often used to attach photos and scrapbooking items into display books.

Product Codes:

Where possible we try & hold stock of the dots per roll required by customers however this is dependent upon what jobs are coming through relative to stock levels.
